MOISTURE CONTROL SYSTEM

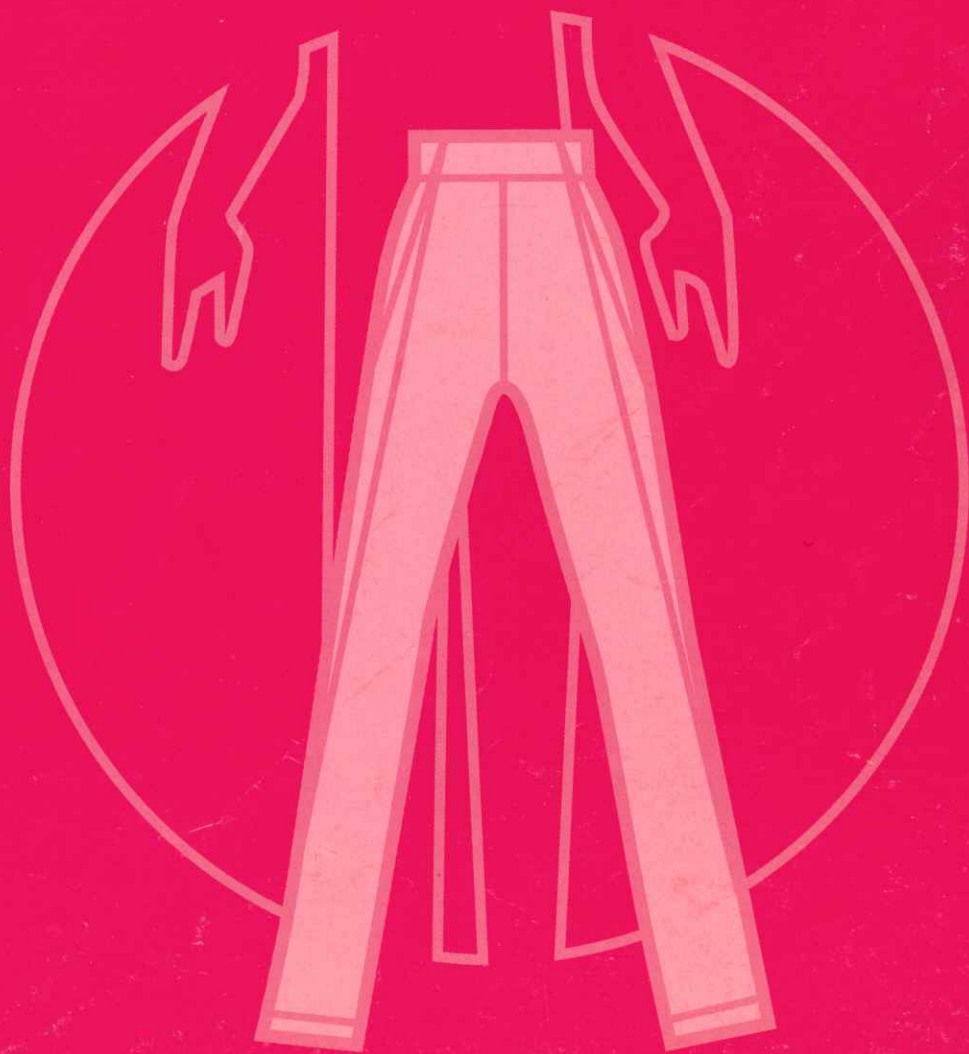

- This polyester fibre is extremely light and can be used to produce flexible and comfortable sports clothing.
- Its hydrophobic property helps the body stay dry by quickly drawing away perspiration.
- Its material absorbs body moisture during activity and wicks it out to the surface in order to make the evaporation quickly.
- 100% polyester material brushed on both sides, light weight with high heat insulation. Exists in different weights and finishes, adapted to each usage, easy-maintenance.
